P/2167-112

STRUCTURED FINANCE PERFORMANCE ANALYTICS SYSTEM

ABSTRACT OF THE DISCLOSURE

A method for providing users with financial reports over a computer network, comprising the steps of: storing respective financial performance data for each of a plurality of securities, each security underlying one of a plurality of structured securities transactions sold by issuers to investors; maintaining an electronic site on the computer network to which the users may connect; receiving search criteria over the computer network from at least one of the users for identifying at least a subset of the financial performance data; retrieving the subset of financial performance data identified by the search criteria, at least some of the subset of financial performance data being arranged in a time series; and providing at least one electronic screen to the at least one user over the computer network, the at least one screen including the subset of financial performance data.
